

REPUBLICAN EXTRAVAGANCE.

Owing to the fact that the DISPATCH-DEMOCRAT job office is crowded to its utmost capacity with work, and requires much of our time, we are compelled to drop our discussion of Republican extravagance for a few weeks. We will take it up again shortly, and we promise our readers to furnish them with some very interesting information.

In the performance of this duty we hope we will not be compelled, as we were last week, to indulge in unpleasant personalities. And at any time when a public officer believes that his acts have been unfairly criticized, we will be pleased to give him an opportunity in the columns of the DISPATCH-DEMOCRAT to offer any explanation or make any correction.

EDITORIAL NOTES.

The meeting of the Democratic County Central Committee next Wednesday should be well attended by the members. Business of importance will come up for consideration.

There are several Democratic candidates for City Marshal. We think it would be a good idea to hold a meeting and center on some one of the candidates. It is simply suicidal for half a dozen to run.

Writ the prospect that the price of wool will go below the lowest notch this spring, the wool-growers who thought they saw a bonanza in the McKinley bill, will begin to ask some serious questions which will make the Republican party feel uneasy.

The United States Supreme Court handed down its decision in the Nebraska Governorship case on Monday of this week. The court upholds Boyd's claims on every point brought up. Boyd will now take his seat as the first Democratic Governor Nebraska ever had. There are a couple of other States that in 1890 elected Democratic governors who have never been allowed to take their seats. The Supreme Court should have a chance to place them where they belong.

We give the following cheering (?) information to those wool growers who have voted the Republican ticket on a promise that the McKinley bill would raise the price of wool. The extract below is taken from the weekly wool market report of the San Francisco Live Stock and Butchers' Gazette, of last week: "It is very certain that the market for the California spring clip will not experience near the prices paid last year. Prices which were so unobtainable as to be actually detrimental to the grower's business. A good article of wool that would sell for \$1.50 a pound will now sell for \$1.00 a pound, and a good article of wool that would sell for \$1.00 a pound will now sell for \$0.75 a pound."

Isn't this encouraging?

The House Committee on Election of President, etc., has approved the principle of Congressional gerrymandering for the election of senators by the direct vote of the people. We hope to see this method adopted. Under our present system there are some men elected senators by the legislatures who would not be elected by the people, and we presume that we betray no confidence when we state that this is true of Democratic as well as Republican senators, although not so great an extent with the former, of course.

We have not heard any Republican papers condemn the Republican gerrymander in California. A fair sample of it is the senatorial district comprising Mendocino, Colusa and Glenn counties. There is not even a wagon trail connecting Mendocino with the other two. They were combined into one district in order to mass a big Democratic vote. Yet our Republican contemporaries are bewailing the fact that the New York Legislature is about to enumerate and re-district that State, which will result in making it Democratic in its legislature and senators for years to come.

The Republicans have got a gerrymander up for Ohio that takes the bakery. As a work of political black art it lays the California gerrymander altogether in the shade. The Rev. Dr. Washington Gladden, of Columbus, O., in a recent lecture to his congregation on the theme, "Do we any longer live under a republican form of Government," said: "There are more white people disfranchised in Ohio to-day because of the unfair districting of the State than there are disfranchised blacks in any Southern State from other causes, and the Republicans are now considering a bill making a still more outrageous gerrymander than the present one."

The death of Charles H. Spurgeon, which occurred at Mentone, France, last Sunday removes from earthly scenes a man who divided with Henry Ward Beecher, the reputation of being the greatest pulpit orator of the present century. What Beecher was to Plymouth Church and the world Spurgeon

was to the London Tabernacle and the world. The finest tribute to Spurgeon's genius as a preacher we ever heard or read was delivered by Hon. W. H. Mills, of San Francisco, in a speech at Napa last spring. As the speech in which this tribute was contained was an extemporaneous one, and no notes were taken of it, we suppose it is lost to the world.

The Republican Press of last week says:

It is refreshing and hopeful to know that the statement of our able and versatile neighbor, "that the California Republican Congressmen speak their sentiments strongly on the Chinese question, and that they always vote the contrary," was simply a trick to deceive.

Our neighbor has been chewing on this rag for a month or more. If the Republican Press will produce any statement made by the DISPATCH-DEMOCRAT to the effect that California Republican Congressmen spoke one way on the Chinese question and voted the other, we will give it a chromo and promise to say nothing hereafter about the extravagance of the Republican administration in this country. If it does not produce the statement referred to we will have to conclude that its editor is unable to understand what he reads.

We have received from Congressman Geary printed copies of the following bills which have been introduced in Congress by him:

A bill to regulate immigration.

A bill to foreclose the mortgage on the Union and Central Pacific Railroads.

A bill to amend naturalization laws.

A bill for the free coinage of American silver.

A bill to regulate mining in California.

A bill to absolutely prohibit the coming of Chinese persons into the United States.

A bill to provide for the disposition and sale of lands known as the Klamath River Indian Reservation.

A joint resolution proposing an amendment to the Constitution of the United States, namely, to elect Senators by the direct vote of the people, and fixing the time of the meeting of Congress.

All the above bills have been read twice and referred to the proper committees, and the bill relative to the sale of the Klamath Indian Reservation lands has been favorably reported to the House.

A MILLION A YEAR.

Lottery and Prize Schemes used to sell Alum and Ammonia Baking Powders.

A New York concern, manufacturers of an ammonia baking powder boasts that its yearly profits are over a million dollars. While, perhaps, none of the makers of alum powders individually can show so large earnings yet their profits are enormous. A business so profitable, will always attract to itself those whose greed will cause them to utterly disregard the effect their traffic may have upon the health or life of others.

Alum baking powders are introduced largely by gifts, prizes and lottery schemes. A piece of glassware or china, a child's wagon, sled, a pewter spoon or some other article of attractive appearance, but of small intrinsic value or cost is given with each purchase, or a number is attached to the can which entitles the customer to a similarly numbered article or to a prize of some kind. It is in some such way as this that the trade in alum and ammonia baking powders, which has now attained such giant proportions and their consumption by the public which has reached an extent which is truly alarming.

The highest authorities of all countries condemn the use of alum in bread with reserve. In America the most distinguished physicians, chemists and hygienists have declared that the traffic in alum baking powders should be suppressed by law. In England and France where the subject of pure food, and its effect upon the system, has been more fully considered and made the subject of extended experiments by the scientists, so serious a matter is the use of alum in bread or other food considered to be, that most stringent laws have been enacted to prevent it. These laws are rigidly enforced, and the sale of alum baking powders would not be permitted for an hour. Any one who attempted to make them for use in food, or attempted to use them for raising bread, biscuit or cake would suffer severe penalties.

The ill effects upon the system of food raised by alum baking powders are the more dangerous because of their insidious character. It would be less dangerous to the community were it fatal at once, for then such food would be avoided; but their deleterious action because imperceptible at first is no less certain.

The puckering effect which alum has when taken in the mouth is familiar to everyone. Physicians say this same effect is produced by it upon the delicate coats of the stomach and intestines.

What household would take home to her family a can of alum or ammonia baking powder if she knew it. Such powders not only undermine the system, but it is pointed out that ammonia taken into the system in even infinitesimal doses day after day, imparts to the complexion a sallow and blotched appearance.

It is safe to discard all baking powders sold with a prize or gift.

What a misnomer are the words "Absolutely Pure," as applied to baking powders two of the largest selling brands, one made from alum, the other containing ammonia, and both of these drugged baking powders have stamped upon their labels and circulars these words absolutely pure, as a matter of fact they are "Absolutely Pure," as shown by official examinations.

Mon's \$10 suits for \$4.45 at the IXL.

Mon's \$2.50 shoes, \$1.85, IXL.

CHATTER.

What the United States need in Chile to-day is a minister who is skilled in diplomacy, has a moderate degree of common sense, and above all has an unimpaired record. Minister Egan is utterly destitute of common sense, has a deplorable record, and if he has a certain degree of diplomacy he is using his nation's prerogative for his own interests.

The New York Tribune thus expatiates upon the power of the present administration: "Look at the country richer, more prosperous, more attractive and inviting than any of the globe, growing in wealth, in comfort, in all things that make a nation great. This is what stands to-day in place of all the distress your friends were predicting a year ago, and this answers all your denunciations of the tariff and your nibbling at its details."

It does nothing of the kind. The Tribune does not believe what it sets forth, and being thus insincere, cannot expect its readers to believe or place any confidence whatever in its sayings. The great organ of Republicanism imposes too much upon the credence of its readers, credulous people though they are.

The assertion which is implied that only when you vote for a Republican candidate with a protective tariff dangling at his heels, will the country be prosperous and productive is preposterous to say the least; to go farther, idiotic.

Many of our most popular American authors, from modesty or other causes prefer to write under a non de plume. There are however, a few writers in America who came originally from across the seas who are not ashamed to sign their true names despite their unappealing and unpronounceable characteristics. Among these is a Norwegian gentleman who starts the reading public with the name of Hjalmar Hjorth Bojesen. Mr. Bojesen has been noted for years for the strong Norse stories which he has contributed to various magazines in this country. His latest, and probably greatest, achievement, however, is the production of "The Mammion of Unrighteousness," a book which is receiving favorable mention wherever read.

Ambrase Pierce, the brilliant satirist of the Examiner, staff has written, in connection with another Pacific Coast writer, a novel entitled "The Monk and the Hangman's Daughter." Mr. Pierce's short stories have already gained an international fame and it is safe to say that his latest publication will be as successful as his former ones.

Wm. Dean Howells, one of the most popular of our present writers, has resigned the position as critic for Harper's Magazine and will undertake the literary editorship of the Cosmopolitan Magazine.

The war scare is dying out, much to the disgust of the daily newspapers who have, with the aid of their ingenious reporters, fanned the flame to its brightest glare. These reports of interviews and such matter should be accompanied by an affidavit testifying as to their veracity.

After the application, the writer of this column is able to portray the latest news, gleaned and condensed to suit the hurried public who have little time to read. It is with the utmost confidence in the reliability of the news that we state:

- 1.-That there will be war with Chile.
- 2.-That there will be eternal peace with Chile.
- 3.-That Patrick Egan is a fool.
- 4.-That no one ever said he wasn't.
- 5.-That Chileans hate Americans.
- 6.-That Chileans love Americans.
- 7.-That the foregoing statement is a lie.
- 8.-That the latter statement is a lie also.
- 9.-That Minister Egan has been assassinated, as he should have been long ago.
- 10.-That Minister Egan has not been assassinated, though he should have been, long ago.

J. L. McN.

The Editors Coming.

The executive committee of the National Editorial Association met in Cincinnati Thursday to select a place for the session of the Association in 1902. The claims of California for the honor were set forth by a committee of the California Press Association, consisting of J. A. Fletcher, of the Placer Herald, Auburn; G. M. Francis, of the Register, Napa; Scipio Craig, of the Citicograph, Redlands; and A. B. Lemmon, of the Republican, Santa Rosa. The committee succeeded in securing the honor and will meet in San Francisco, May 17. The National body has a thousand members, fully 800 of whom will attend the California meeting, and visit every point of interest in the State.

The S. F. & N. P. Railway.

There is but little doubt that the San Francisco and North Pacific Railroad will be sold before long. This is indicated by a statement recently made by an Examiner reporter by Peter McGlynn, the present treasurer of the Northern Pacific, and an officer of the railroad. He states that it will be necessary to sell the line to satisfy the legacies left by the late Col. Donahue. In connection with the above the Examiner says:

The statement is made by people at Fourth and Townsend streets that Henry Villard, who wields influence in the Northern Pacific Company by reason of his representing its German bondholders, has been figuring on a scheme by which he can see his way clear to buy the Donahue line, extend it up along the coast through Eureka, the Coos Bay district of Oregon and finally into Portland, the present terminus of the Northern Pacific, thereby securing to the latter an entrance by rail into this city through a region of country in both Oregon and California that can be made productive in lumber and other articles of shipment if only given railroad development.

No healthy person need fear any dangerous consequences from an attack of la grippe if properly treated. It is much the same as a severe cold and requires precisely the same treatment. Remain quietly at home and take Chamberlain's Cough Remedy as directed for a severe cold and a prompt and complete recovery is sure to follow. This remedy also counteracts any tendency of la grippe to result in pneumonia. Among the many thousands who have used it during the epidemics of the past two years have never to learn of a single case that has not recovered or that has resulted in pneumonia. 50 cent bottles for sale at J. R. Matthews.

FRUIT PESTS.

Rules of the State Board of Horticulture.—A Good Receipt.

Following are the amended regulations of the State Board of Horticulture relative to the prevention and destruction of fruit pests. Below will also be found a receipt for winter use for San Jose scale:

RULE I. All consignees, agents, or other persons shall, within twenty-four (24) hours, notify the Local Inspector or Quarantine Guardian of the arrival of any trees, plants, buds, seeds, pits, or cions, at the first point of debarkation in the State of California.

RULE II. All trees, plants, cuttings, grafts, buds, seeds, pits, or cions imported or brought from any foreign country, or from any of the United States or Territories, are hereby required to be disinfectanted immediately upon arrival at any point where they are to be unloaded; and furthermore, if any of said trees, plants, cuttings, grafts, buds, seeds, pits, or cions are found infested with insects (or their germs), or with any fungi, blight, or any other diseases injurious to fruit or to fruit trees, or to other trees or plants, they shall remain in quarantine for a period of fourteen (14) days, or until the Quarantine Officer, Quarantine Guardian, Local Inspector, or County Horticultural Commissioner can determine whether the said plants, cuttings, grafts, buds, seeds, pits, or cions are free from injurious insects, pests, or their germs, or pupae, before they can be offered for sale, gift, or transportation, as hereinafter provided.

RULE III. All trees, plants, cuttings, grafts, buds, seeds, pits, or cions infested with any insect or insects (or their germs), blight, or any other diseases that are known to be injurious to fruit or fruit trees, or to other trees or plants, and liable to spread contagion, are hereby required to be disinfectanted before removal for distribution or transportation, or before being offered for sale or gift.

RULE IV. All peach, nectarine, apricot, plum, prune, almond, or other trees budded or grafted upon peach or other stocks or roots, and all peach or other pits, cuttings, buds, or cions, raised or grown in a district where the "Peach Yellow" or the "Peach Rosette" are known to exist, are hereby prohibited from being offered for sale, gift, distribution, or planting within the State of California.

RULE V. Fruit of any kind grown in any foreign country, or in any of the United States or Territories, or in the State of California, and found infested with any insect or insects (or their germs), or with any fungi, blight, or other diseases known to be injurious to fruit or fruit trees, or to other trees, are hereby prohibited from being offered for sale, gift, or distribution.

RULE VI. Transportable material of any kind infested by any insect or insects (or their germs) or by any fungi, blight, or other diseases known to be injurious to fruit or fruit trees, or to other trees, and liable to spread contagion, is hereby prohibited from being offered for sale, gift, distribution, or transportation, until said material has been disinfectanted by dipping it in boiling water and allowing it to remain in said boiling water not less than two minutes; said boiling water used as such disinfectant to contain in solution not less than one pound of concentrated potash to each and every ten gallons of water.

RULE VII. All trees, plants, cuttings, grafts, buds, seeds, pits, or cions shall be disinfectanted by fumigation with hydrocyanic acid gas, as follows: Said trees, plants, cuttings, grafts, buds, seeds, pits, or cions shall be covered with an air-tight tent, or box, and for each and every one hundred cubic feet of space therein one ounce of fused cyanide of potassium (58 per cent), one fluid ounce of sulphuric acid, and two fluid ounces of water shall be used. The cyanide of potassium shall be placed in an earthenware vessel, the water poured over the said cyanide of potassium, afterwards adding sulphuric acid, and the tent, or box, to be immediately closed tightly, and allowed to remain closed for not less than forty minutes. After said trees, plants, cuttings, grafts, buds, seeds, pits, or cions have been treated with hydrocyanic acid gas, as above directed, they shall remain in quarantine for fourteen days for subsequent inspection, if deemed necessary by a State Commissioner of Horticulture, County Horticultural Commissioner, Quarantine Officer, Quarantine Guardian, or Local Inspector, for further disinfection.

RULE VIII. All trees, plants, cuttings, grafts, buds, seeds, pits, or cions shall be disinfectanted by fumigation with hydrocyanic acid gas, as follows: Said trees, plants, cuttings, grafts, buds, seeds, pits, or cions shall be covered with an air-tight tent, or box, and for each and every one hundred cubic feet of space therein one ounce of fused cyanide of potassium (58 per cent), one fluid ounce of sulphuric acid, and two fluid ounces of water shall be used. The cyanide of potassium shall be placed in an earthenware vessel, the water poured over the said cyanide of potassium, afterwards adding sulphuric acid, and the tent, or box, to be immediately closed tightly, and allowed to remain closed for not less than forty minutes. After said trees, plants, cuttings, grafts, buds, seeds, pits, or cions have been treated with hydrocyanic acid gas, as above directed, they shall remain in quarantine for fourteen days for subsequent inspection, if deemed necessary by a State Commissioner of Horticulture, County Horticultural Commissioner, Quarantine Officer, Quarantine Guardian, or Local Inspector, for further disinfection.

RULE IX. All trees, plants, cuttings, grafts, buds, seeds, pits, or cions imported or brought into the State shall be inspected upon arrival at first point of debarkation, and if found infested with injurious insects which have not been destroyed by the remedies required by Rules VII and VIII of these regulations, they shall be proceeded against as a nuisance.

RULE X. Any person or persons having in their possession any trees, plants, cuttings, grafts, buds, seeds, pits, or cions infested with any insect or insects (or their germs), or with any fungi, blight, or other diseases injurious to fruit or to fruit trees, or to other trees or plants, and who refuse or neglect to disinfect the said trees, plants, cuttings, grafts, buds, seeds, pits, or cions, as required by Rules VII and VIII of these regulations, after having been notified to do so by a State Commissioner of Horticulture, County Horticultural Commissioner, Quarantine Officer, Quarantine Guardian, or Local Inspector, the said trees, plants, cuttings, grafts, buds, seeds, pits, or cions shall be declared a public nuisance, and shall be proceeded against as provided by law.

TIME, SULPHUR AND SALT FOR WINTER USE UPON DECIDUOUS TREES.

For San Jose Scale and Lecanidians.

The following formula and directions,

THE BAMBINO.

In the old church of Ara Cella, near the foot of the capital steps, in the city of Rome, is a little treasury room where the sacred vestments are kept, and where, in a wonderful little repository, lies a wooden doll called the Bambino, representing the "Holy Child Jesus." So strong is the superstition with regard to this child that in cases of illness, and he is quoted as saying that he often sees a siphon of seltzer standing in a room where he is visiting a patient prostrated with the malady. Such siphon, he declares in substance, unless most carefully and antiseptically cleaned, will convey infection to subsequent cases. And everybody knows what the cleansing of public bottles is apt to be. The same objection has been urged against our present system of traveling milk vessels. So accepted is this that, when typhoid fever specially prevails, physicians frequently urge persons to boil all milk used as well as water.

It would be a wise thing if the women of our cities could co-operate to attempt to reduce the evil. If inspectors visited bottle washing places it is suspected some valuable unpleasant information might be gained. In the meantime, every housekeeper can make it her conscientious duty to see that the bottles which daily water her domain are unstained and wholly clean. This will need inspection, as the best of maids get careless in a duty oft performed. If there is illness in the house redouble your vigilance and be rewarded with the reflection that in this respect at least the sin of contributing to your neighbor's menace does not lie at your door.—Her Point of View in New York Times.

Family Criticism.

If a man's foes are those of his own household, certainly a woman's severest critics are to be found there also. Few of us realize how often our words and actions are being weighed and measured by the observers, large and small, who surround us. We are unconscious of the judgments passed, because they are usually silent ones. When they happen to be spoken out instead of only thought we are taken aback and sometimes appalled at the arraignment and sentence, of which we had been entirely unaware.

It is the privilege of the family critic to be ruthlessly frank. Politeness is unnecessary, and consideration for the feelings of the condemned one ridiculously inappropriate. The strictures are given carelessly and freely, and offense at the plain speaking is a contingency never imagined.

It is only Jeanie, she always says "what she thinks." "No one minds Will; he always speaks out." "One's family, of course, may say anything." And why, pray?

Children are the most terrible of family critics. They see so straight. Your "no" to them is "yes," and your "yes" is "no." You cannot deceive them with half truths or by a juggle of words. They cut through your subterfuge and convict you at once. Their straightforward simplicity makes you ashamed of your falsehood.—Harper's Bazar.

Valuable Deposit.

One of the most remarkable of all deposits of silver is at the Broken Hill mines in Australia. At that place the precious metal is found lying in an enormous lode.

It has been suggested by Mr. George Sutherland that this great deposit of silver be left by a large salt lake that has now disappeared, but traces of whose former existence are clearly to be seen.

According to this interesting theory, the salt lake was formed of imprisoned ocean water, a large quantity of which was caught in a basin between ranges of hills when Australia was lifted out of the sea. The water gradually leaked and was evaporated away, leaving deposits of the mineral and other matter that it had held in solution.

If this view is correct, the great store of silver at Broken Hill is a rich gift bestowed by the sea upon the land; but man has discovered the precious deposit, and seized it by his capacity of the land and was evaporated away, leaving deposits of the mineral and other matter that it had held in solution.

If this view is correct, the great store of silver at Broken Hill is a rich gift bestowed by the sea upon the land; but man has discovered the precious deposit, and seized it by his capacity of the land and was evaporated away, leaving deposits of the mineral and other matter that it had held in solution.

Third Visit to Ukiah.

The Bellevue Medical Specialists, of New York City, will be represented at the Curtis House from Tuesday noon until Wednesday noon, Feb. 9 and 10. They will visit Ukiah once every four weeks, and to establish a wide reputation will render their services free of charge. They treat nasal catarrh, dyspepsia, rheumatism, nervous debility, diseases of the skin, eyes, ears, throat, lungs, liver, kidney and female diseases. They attribute their phenomenal results to the purity and rarity of the drugs they use, the most careful diagnosis and direct method of reaching the very seat of the disease. They make every case a special study, but will not take a case to treat without a certainty of making a complete cure. They do not advertise their cures, or in any way bring their patients into publicity.

Land and Water Rights.

The Mendocino Land and Water Company has incorporated in San Francisco for the purpose of acquiring lands and water rights and franchises in the County of Mendocino, and to dispose of the products of the same. Capital stock, \$500,000. The Directors are: George G. Buckland, S. T. Dodson, W. J. Phillips, P. H. Johnston and S. T. Dodson, Jr.

Vick's Floral Guide, 1892.

True and tried friends are always welcome, consequently "Vick's Floral Guide" is sure of a warm reception, especially when it is dressed as daintily as this year. The "Kellie Lewis" ornament on the front of cover, and "Brilliant Poppies" on the back, are unusually attractive, and the numerous colored plates of flowers and vegetables are certainly works of art and merit. The first twenty-four pages, printed in violet ink, describe Novelties and Specialties. Send ten cents to James Vick's Sons, Rochester, N. Y., and procure a copy of this attractive and useful catalogue. It costs nothing, as the ten cents can be deducted from the first order.

The Mutual Relief Association of Petaluma.

The Mutual Relief Association of Petaluma is the oldest and one of the best managed mutual life associations in the country. It has paid \$75,949 in benefits to the nominees of deceased members. It has returned to its living members in dividends \$78,600, saving that in assessments, and making it one of the cheapest societies in existence. It is managed solely in the interests of its members, no one but the Secretary being paid a salary. It has a reserve fund of nearly \$50,000, all well and safely invested. It has been in successful operation over 21 years. J. E. Whitson is agent for the association. We recommend him as being a reliable and trustworthy man. The Association is a good, reliable co-operative life insurance company. Many reliable men in our town are members of the association.

Resolutions.

The following resolutions were adopted by Kingsley Chapter, O. E. S., on February 1, 1902: WORKING MATRON.—The Committee selected by you to draft resolutions of respect for Sister Budd, submit the following:

Resolved, That the Grand Master has visited us again, and for the first time taken a Sister; therefore be it

Resolved, That we recognize our Heavenly Father's merits in our long continued prosperity, and in the fact that we are now gathered to himself the blessed dead.

Resolved, That in the death of Sister Budd, a worthy and exemplary citizen has been taken from our community, a Christian from the Church, and a loved member from our Chapter.

A Very Common Want.

"Out of sorts," "distracted," "the blues," these are familiar appellations for uncomfortable, undefined sensations, accompanied with head-ache, nervousness, indigestion. Poverty of the blood, the state with which women are persistently used is the paramount need, is conducive efficiency that the system is insufficiently supplied with the elements of life. For in other cases where organic disease does not exist—the food is not assimilated. Reinforce the flagging energies of the system, and the condition of the blood, keep up a healthy condition of the system, and the system will be able to resist the attacks of the blues. For over thirty years this popular medicine has supplied the common want of the nervous system, the digestive and of persons deficient in vitality, a efficient tonic. To its use, the state with which women are persistently used is the paramount need, is conducive efficiency that the system is insufficiently supplied with the elements of life. For in other cases where organic disease does not exist—the food is not assimilated. Reinforce the flagging energies of the system, and the condition of the blood, keep up a healthy condition of the system, and the system will be able to resist the attacks of the blues. For over thirty years this popular medicine has supplied the common want of the nervous system, the digestive and of persons deficient in vitality, a efficient tonic.
